

## Something Not Working?

4502 KLONDIKE CT.

### **Outlets have no power?**

1. Check your breaker box for a tripped breaker.

Your labeled breaker box is:

Located in the Laundry / Arctic Entry Room.

Turn the corresponding breaker off and then on again - even if it appears untripped.

2. Check for a tripped GFI outlet.

Tips Look here:

Kitchen - floor wall

Kitchen - behind the refrigerator

Restroom - to the right of sink

Laundry / Arctic Entry Room - to the right of the washer and dryer.

Outside plugins (2) - located on the outside walls.

Note: there could be additional outlets with GFI breakers not listed.

*\*All GFI outlets have a reset button - press it.*

*There may be a number of plugins not listed please look around the house.*

### **Dryer not drying clothes?**

1. Vacuum the dryer vent to make sure it's not clogged with lint

2. Getting hot in the Laundry / Arctic Entry Room - Make sure the dryer exhaust is hooked up to the vent - sometimes the duct can fall off
